GRADES 2ND-5TH

# AWARD-WINNING camps

## WINTER CAMP

December 27 & 28, 2018

9 AM- 4PM

Join our naturalists as we explore what Florida winters have to offer! Become a botanist for the day and experience vibrant plant life of local gardens. Learn how sustainable gardening can be used in your own backyard and pot your own plant! During another adventure, step into the shoes of a biologist as we walk along the boardwalks of swampy habitats and use our binoculars to spot scaly, feathery, or furry creatures. Be citizen scientists as we participate in Audubon's 119th Christmas bird count.

*Parents please note that field trips and locations are contingent upon weather and may be subject to change.*
